Project Description

This project involved the installation of pedestrian ramps at designated locations in the Borough of Queens as per standard drawings and specification of NYCDOT. This work included the removal and replacement of sidewalks, curbing, and non-standard pedestrian ramps at various locations. This \$3,000,000 construction project was completed in 2014 on-time and within budget.

Competitive Advantages

KAG Engineering, PLLC [KAGE] provided a Construction Inspector that was responsible for monitoring all field activities on the construction project. These duties included daily inspection reports, concrete testing and ensuring that the project remained on schedule and budget.

Project Duration

May 2014 through December 2014
